Roots: The Dynamic Interface between Plants and the Earth

The 6th Symposium of the International Society of Root Research, 11–15 November 2001, Nagoya, Japan

Guest editor:
J. Abe

Preface **ix**

List of contributors **xi–xii**

Structural aspects of bulge formation during root hair initiation
M. Čiamporová, K. Dekánková, Z. Hanáčková, P. Peters, M. Ovečka and F. Baluška **1–7**

Morphological and physiological characteristics of a root-hairless mutant in rice (*Oryza sativa* L.)
N. Suzuki **9–17**

Growth and cell wall changes in rice roots during spaceflight
T. Hoson, K. Soga, K. Wakabayashi, S. Kamisaka and E. Tanimoto **19–26**

Super roots in *Lotus corniculatus*: A unique tissue culture and regeneration system in a legume species
R. Akashi, T. Kawano, M. Hashiguchi, Y. Kutsuna, S.-S. Hoffmann-Tsay and F. Hoffmann **27–33**

Searching for quantitative trait loci controlling root traits in maize: a critical appraisal
R. Tuberosa, S. Salvi, M.C. Sanguineti, M. Maccaferri, S. Giuliani and P. Landi **35–54**

Relative importance of nodal roots and apical buds in the control of branching in *Trifolium repens* L.
R.G. Thomas, M.J.M. Hay, P.C.D. Newton and J.C. Tilbrook **55–66**

Biological activities and structure-activity relationship of substitution compounds of *N*-[2-(3-indolyl)ethyl]succinamic acid and *N*-[2-(1-naphthyl)ethyl]succinamic acid, derived from a new category of root-promoting substances, *N*-(phenethyl)succinamic acid analogs
M. Itagaki, H. Soejima, K. Ishii, T. Sugiyama and Y. Hayashi **67–75**

Jasmonates promote cabbage (*Brassica oleracea* L. var *Capitata* L.) root and shoot development
F.J. Toro, L. Martín-Closas and A.M. Pelacho **77–83**

Silicification of bamboo (*Phyllostachys heterocycla* Mitf.) root and leaf
A. Lux, M. Luxová, J. Abe, S. Morita, S. Inanaga **85–91**

How do roots penetrate strong soil?
L.J. Clark, W.R. Whalley and P.B. Barraclough **93–104**

Conservation and divergence of signaling pathways between roots and soil microbes – the *Rhizobium*-legume symbiosis compared to the development of lateral roots, mycorrhizal interactions and nematode-induced galls
U. Mathesius **105–119**

Influence of pasture management (nitrogen and lime addition and insecticide treatment) on soil organisms and pasture root system dynamics in the field
L.A. Dawson, S.J. Grayston, P.J. Murray, R. Cook, A.C. Gange, J.M. Ross, S.M. Pratt, E.I. Duff and A. Treonis **121–130**

Host-specific plant signal and G-protein activator, mastoparan, trigger differentiation of zoospores of the phytopathogenic oomycete *Aphanomyces cochlioides*
Md. Tofazzal Islam, T. Ito and S. Tahara **131–142**

Reporter genes: applications to the study of arbuscular mycorrhizal (AM) fungi and their symbiotic interactions with plant roots
R. Bergero, L.A. Harrier and P. Franken **143–155**

A comparison of root characteristics in relation to nutrient and water stress in two maize hybrids
T. Vamerali, M. Saccomani, S. Bona, G. Mosca, M. Guarise and A. Ganis **157–167**

Fibrous root turnover and growth in sugar beet (*Beta vulgaris* var. *saccharifera*) as affected by nitrogen shortage
T. Vamerali, A. Ganis, S. Bona and G. Mosca **169–177**

The effects of elevated atmospheric CO_2 and soil P placement on cotton root deployment
S.A. Prior, H.H. Rogers, G.L. Mullins and G.B. Runion **179–187**

Genotypic and environmental variations in root morphology in rice genotypes under upland field conditions
M. Kondo, P.P. Pablico, D.V. Aragones, R. Agsibit, J. Abe, S. Morita and B. Courtois **189–200**

Regulation of root development in sweetpotato and cassava by soil moisture during their establishment period
J.R. Pardales Jr. and A. Yamauchi **201–208**

Histological observation of secondary aerenchyma formed immediately after flooding in *Sesbania cannabina* and *S. rostrata*
H. Shiba and H. Daimon **209–215**

Physiological implications of ultradian oscillations in plant roots
S. Shabala **217–226**

Responses of root length/leaf area ratio and specific root length of an understory herb, *Pteridophyllum racemosum*, to increases in irradiance
T. Tani, H. Kudoh and N. Kachi **227–237**

Oxidative stress triggered by aluminum in plant roots
Y. Yamamoto, Y. Kobayashi, S.R. Devi, S. Rikiishi and H. Matsumoto **239–243**

Rapid changes in levels of mineral nutrients in root-tip cells following short-term exposure to aluminium
S. Ishikawa, T. Wagatsuma and T. Ikarashi **245–251**

Fine root growth and element concentrations of Norway spruce as affected by wood ash and liquid fertilisation
M. Genenger, S. Zimmermann, D. Hallenbarter, W. Landolt, E. Frossard and I. Brunner **253–264**

Rooting strategy of naturally regenerated beech in Silver birch and Scots pine woodlands
T. Curt, B. Prévosto **265–279**

Root system development of *Larix gmelinii* trees affected by micro-scale conditions of permafrost soils in central Siberia
T. Kajimoto, Y. Matsuura, A. Osawa, A.S. Prokushkin, M.A. Sofronov and A.P. Abaimov **281–292**

Root growth characteristics, biomass and nutrient dynamics of seedlings of two larch species raised under different fertilization regimes
Q. Laiye, A.M. Quoreshi and T. Koike **293–302**

Growth characteristics of root-shoot relations of three birch seedlings raised under different water regimes
T. Koike, M. Kitao, A.M. Quoreshi and Y. Matsuura **303–310**

Seasonal changes in the contribution of root respiration to total soil respiration in a cool-temperate deciduous forest
M.-s. Lee, K. Nakane, T. Nakatsubo and H. Koizumi **311–318**

Subsoil root activity in tree-based cropping systems
J. Lehmann **319–331**

Tomato root distribution, yield and fruit quality under subsurface drip irrigation
R.M.A. Machado, M. do Rosário, G. Oliveira and C.A.M. Portas **333–341**

Effect of organic and inorganic fertigation on yields, 15N values, and 13C values of tomato (*Lycopersicon esculentum* Mill. cv. Saturn)
A. Nakano, Y. Uehara and A. Yamauchi **343–349**

Non-invasive imaging of roots with high resolution X-ray micro-tomography
P.J. Gregory, D.J. Hutchison, D.B. Read, P.M. Jenneson, W.B. Gilboy and E.J. Morton **351–359**

Simultaneous X-ray imaging of plant root growth and water uptake in thin-slab systems
A. Pierret, M. Kirby and C. Moran **361–373**

Comparison of tomato root distributions by minirhizotron and destructive sampling
R.M.A. Machado, M. do Rosário and G. Oliveira **375–385**

Analysis of root images from auger sampling with a fast procedure: a case of application to sugar beet
T. Vamerali, M. Guarise, A. Ganis, S. Bona and G. Mosca **387–397**

A new approach for the quantification of root-cap mucilage exudation in the soil
M. Iijima, Y. Sako and T.P. Rao **399–407**

Root-pressure driven xylem sap flow in greenhouse melon (*Cucumis melo* L.): diurnal change and the effects of shading, growth stage, rootstock and fruit number
A. Yamasaki **409–412**

Suppression of nitrification and nitrous oxide emission by the tropical grass *Brachiaria humidicola*
T. Ishikawa, G.V. Subbarao, O. Ito and K. Okada **413–419**

Volume 255 No. 2

The influence of topography and pasture management on soil characteristics and herbage accumulation in hill pasture in the North Island of New Zealand
I.F. López, M.G. Lambert, A.D. Mackay and I. Valentine **421–434**

***In vitro* symplasmata formation in the rice diazotrophic endophyte *Pantoea agglomerans* YS19**
Y. Feng, D. Shen, X. Dong and W. Song **435–444**

Plant and soil microbial community responses to solid waste leachates diffusion on grassland
R. Gros, F. Poly, L.J. Monrozier and P. Faivre **445–455**

Fluxes of nitrous oxide and methane from drained peatlands following forest clear-felling in southern Finland
J.T. Huttunen, H. Nykänen, P.J. Martikainen and M. Nieminen **457–462**

The ability of the biological control agent *Bacillus subtilis*, strain BB, to colonise vegetable brassicas endophytically following seed inoculation
E.G. Wulff, J.W.L. van Vuurde and J. Hockenhull **463–474**

Contrasting growth response of an N_2-fixing and non-fixing forb to elevated CO_2: dependence on soil N supply
T.D. Lee, M.G. Tjoelker, P.B. Reich and M.P. Russelle **475–486**

Respiration activity of ectomycorrhizas from *Cenococcum geophilum* and *Lactarius* sp. in relation to soil water potential in five beech forests
J.-L. Jany, F. Martin and J. Garbaye **487–494**

Influence of mycorrhizal associations on foliar $\delta^{15}N$ values of legume and non-legume shrubs and trees in the fynbos of South Africa: Implications for estimating N_2 fixation using the ^{15}N natural abundance method
A.C. Spriggs, W.D. Stock and F.D. Dakora **495–502**

Response of fine roots to an experimental gap in a boreal *Picea abies* forest
O. Taskinen, H. Ilvesniemi, T. Kuuluvainen and K. Leinonen **503–512**

A comparison between measured and modeled N_2O emissions from Inner Mongolian semi-arid grassland
Xu-Ri, Y. Wang, X. Zheng, B. Ji and M. Wang **513–528**

Root distribution of a Mediterranean shrubland in Portugal
J.S. Silva and F.C. Rego **529–540**

Residual nitrogen contribution from grain legumes to succeeding wheat and rape and related microbial process
J. Mayer, F. Buegger, E.S. Jensen, M. Schloter and J. Heß **541–554**

Growth promotion of *Prunus* rootstocks by root treatment with specific bacterial strains
A. Bonaterra, L. Ruz, E. Badosa, J. Pinochet and E. Montesinos **555–569**

Plant growth promoting rhizobacteria as biofertilizers
J.K. Vessey **571–586**

Leaf appearance, tillering and their coordination in response to NxP fertilization in barley
P. Prystupa, G.A. Slafer and R. Savin **587–594**

Relationship between plant nitrogen conservation strategies and the dynamics of soil nitrogen in the arid Patagonian Monte, Argentina
A.L. Carrera, M.B. Bertiller, C.L. Sain and M.J. Mazzarino **595–604**

Diversity and compatibility of peanut (*Arachis hypogaea* L.) bradyrhizobia and their host plants
Q. Chen, X. Zhang, Z. Terefework, S. Kaijalainen, D. Li and K. Lindström **605–617**

Relative contributions of soil chemistry, plant physiology and rhizosphere induced changes in speciation on Ni accumulation in plant shoots
F. Pinel, E. Leclerc-Cessac and S. Staunton **619–629**

Microbial population dynamics on seeds during drum and steeping priming
B. Wright, H. Rowse and J.M. Whipps **631–640**

Model and whole-plant studies on the anchorage capabilities of bulbs
S.B. Mickovski and A.R. Ennos **641–652**

Erratum **653–654**

Volume contents **655–659**

Author index **661–662**
